-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 01 November 2002.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on _____ is: a) ☐ approved b) ☐ disapproved by the Examiner.
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
* See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). _____
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s) _____. 6) ☐ Other: _____

DETAILED ACTION

Drawings

1. The formal drawings were received on May 16, 2002. These drawings are accepted.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-4 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 5,584,207 to Paul et al.

Paul et al. clearly teaches the construction of the construction of a motor supporting device (100) comprising:

a motor accommodating section (154) for accommodating and holding a motor (124) therein, and

a gear holding section (164, 166) that rotatably holds a gear (112, 118) for externally transmitting a driving force of said motor,

wherein said motor supporting device further comprises a covering section (132), which is monolithically/integrally formed with said motor accommodating section and flatly covers said gear holding section.

4. With regards to claim 2, Paul et al. disclose a covering section comprising a side pressing section that abuts to an end portion of said gear provided to a drive shaft of the motor as shown in Figure 2.

Art Unit: 2834

5. With regards to claim 3, Paul et al. disclose a fitting section (150,138) for fixing said covering section to said motor accommodating section, with said side-pressing section being abutted to the end portion of said gear mounted to said motor drive shaft, said fitting section being provided to at least either one of said covering section and said motor accommodating section as shown in Figure 2.

6. With regards to claims 4 and 6, Paul et al. disclose a fitting section for (168, 170) coupling the end portion of a support shaft that is formed in said gear holding section for rotatably holding the gear to said covering section, said fitting section being provided to at least either one of said covering section and the end portion of said support shaft as shown in Figure 2.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 5, 7 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S.

Patent No. 5,584,207 to Paul et al. in view of U.S. Patent No. 5,654,847 to Yagi et al.

Paul et al. discloses the construction of a motor supporting device as described above.

However, it fails to disclose a covering section being bendably formed with respect to said motor accommodating section, and comprises a side pressing section that abuts to the end portion of said gear provided to the motor shaft.

Yagi et al. teaches the construction of link portions (15c) being bendably formed for the purpose of connecting the printed circuit board (15b) to the printed circuit board (15a) of the base (11).

It would have been obvious to one skilled in the art at the time the invention was made to use the link portions disclosed by Yagi et al. on the motor supporting device disclosed by Paul et al. for the purpose of connecting the covering section to the motor supporting device in a one-piece bendable construction.

9. With regards to claim 8, Paul et al. disclose a fitting section (150,138) for fixing said covering section to said motor accommodating section, with said side-pressing section being abutted to the end portion of said gear mounted to said motor drive shaft, said fitting section being provided to at least either one of said covering section and said motor accommodating section as shown in Figure 2.

Response to Arguments

10. Applicant's arguments filed November 1, 2002 have been fully considered but they are not persuasive.

11. In response to applicant's argument that Paul fails to disclose a motor accommodating portion for accommodating and holding a motor therein, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to

the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

12. In response to applicant's argument that the housing cover (132) is fitted to the integrally-formed housing member (130), before the motor assembly (122) is attached to the cover, it must be noted that the method of forming the device is not germane to the issue of patentability of the device itself.

Conclusion

13. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.

14. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Application/Control Number: 09/554,670
